MASSUM with the support of the USAID project - Activities in the High Schools Education system - SEA, in the period from the 6th till the 8th of April 2006, on the Skopje Fair, for the first time organized the event "Educational Rendezvous" on which 70 High Schools presented their work and activities. During the 3 day period in both of the Fair halls, the students had the chance to show their abilities, skills and crafts through competitions, talent shows and a fashion show.

More than 10 000 students from all over Macedonia came to the fair during the three day period, and more than 1200 students took part in the competitions for Job Interview, Public Speech, Best Marketing and Business Plan, Best Real High School Company, Best Web Page, Poster and Commercial for high school. More than 3000 primary school graduates from all over the country had the ability through organized transport to visit the fair and had the chance to select in which High School they can continue the process of education.

This caught the attention of the media, the Government institutions, the industry and donators, and at the same time it sparked the enthusiasm with the students and teachers alike for improvement of their knowledge and skills connected with these activities.

Encouraged by the great interest with the student for this kind of activities where they can show their knowledge and skills, MASSUM with the support of USAID, the Ministry of Education and Science and the business partners, continued with the realization of this great event also in 2007, 2008 and 2009 and at the same time made the Educational Rendezvous the biggest High School event in Macedonia.

This event is visited by an average of 30 000 students form the High schools and around 5000 students from the Primary schools with more that 1200 students participants in a large number of competitions, workshops and presentations.
